# Safety and Security

**Armourshield products range:**

## **1. Body Armour:**

Body armour is available in a variety of ballistic configurations, in both overt and covert styles. One can achieve an appropriate protection level by choosing one of three ballistic packs offering differing weights whilst maintaining the same protective capabilities.

- VIP ultra lightweight
- Military
- Law Enforcement
- Special Forces

**SCO/IIIA-1 –Value Body Armour**  
Certified to NIJ Level IIA

## Protection Level:

### Ballistic Protection

The SCO/IIIA-1 unit is certified to NIJ standard 0101.04 Level IIIA:

9x19mm FMJ	@ 358 m/s
.357 Mag JSP	@ 450 m/s
9x 19mm MK 2Z	@ 420 m/s
.44 Magnum	@ 426 m/s

When used in conjunction with ceramic composite upgrade plate the SCO/IIIA-1 will defeat high velocity single rifle fire (six shots NIJ level III standard) or (one shot NIJ Level IV standard) depending on the plate used.

#### • Upgrade plate

1012-GR-III and 1012-GR-IV HARD ARMOUR UPGRADE PLATES  
250 mm x 300 mm single curve ceramic composite upgrade  
plates provide either Level III or Level IV production  
in conjunction with SCO/IIIA-1 vest.

Each plate comprises a ceramic plate supported by glass reinforced plastic (GRP) laminate.

## Protection Level

In conjunction with the Level IIIA vest the plates will defeat the following rounds at 5m range and limit blunt trauma to very low levels.

Plate	Caliber	Bullet	Velocity	Shots
1012-GR-III	7.62 x 39 mm	Ball	720m/s	6
1012-GR-III	7.62 x 51 mm	Ball	830m/s	6
1012-GR-IV	7.62 x 51 mm	AP	820m/s	1
1012-GR-IV	30-06 (M2)	AP	840m/s	1

### Armourshieled patent

Armourshieled have included a patented system of trauma reduction in all their body armour products. The Armourshield Blunt Trauma System protects the wearer from the effects of blunt trauma by absorbing energy and distributing forces over a much larger area.
